## EF-30-50-60-72 LR END FEED GRINDERS

The EF-30 to 72 grinders are part of Cresswood's "Destroyer Series" of very large, yet general purpose grinders, with the added efficiency of a horizontal fed grinder. They are designed for pallet companies, large furniture manufacturers and other companies wishing to dispose of whole pallets, cants or slabs up to 7+ inches thick and 72 inches wide. They are also able to handle very long strips right off straight line rip or gang saws and can reduce skeletons from a router. Ideal for size reduction, the EF's throughput can be optimized for your application with a choice of screens, cutters, cutter placement, and rotor selection.
