CRESSWOOD - Empowering 'Eco-Superior' & Profitable Recycling Since 1978!

GATEWAY RECYCLING

"The Cresswood Shredder is a perfect fit for Gateway's secure document and product destruction requirements. It's universal enough to handle the niche market material we shred, while putting it into a saleable commodity particle size. As a Recycler, the 'uniformity of particle gradation', and control of output characteristics are as important as volume and production rates. The Cresswood does it all for us."

"When we shopped for a shredder, structural integrity was our # 1 criteria. We looked around, but the quality of Cresswood's engineering and workmanship was far superior to the competition. From the date of delivery in 2007, we have had no problems with the Destroyer - just normal preventive maintenance on the machine - and we're not foreseeing any. We're that satisfied with the Cresswood."

Tom Sustersic
President/Owner

GATEWAY PRODUCTS RECYCLING, INC. Cleveland, OH

Gateway Recycling, headquartered in Cleveland, Ohio is a 'full-service, full-circle' recycling company that specializes in secure destruction of sensitive materials and products for businesses throughout the state.

A Cresswood HF-7870-125 Shredder is the core of Gateway's closed-loop, verified off-site shredding system for documents, books, coupons, packaging, and a range of confidential products.

Cresswood Offers: Single-Shaft, Low-Speed, Eco-Friendly Shredders and Turnkey Systems for the Document Storage and Secure Destruction Industries - Paper, Plastic, Fabric, E-Scrap
