

"DIGIMAX DESTROYER" HARD DRIVE SHREDDER

Cortland, IL

CRESSWOOD LAUNCHES NEW SHREDDER!

As the regulatory environment around 'end of life' for digital media heats up, and threats of identity theft and security breaches intensify, your customers seek to reduce both risks, and the cost of compliance. The profitable upside of these demands are new service offerings and business opportunities for Recyclers, and Secure Destruction companies.

Innovating to meet growing niche-market requirements for hard drive, digital device, and digital media destruction, Cresswood Shredding Machinery has launched the "DigiMax Destroyer" Hard Drive Shredder. Designed for higher-volume processing, the heavy-duty DigiMax can completely shred up to 600 hard drives per hour down to a particle size that will meet e-Cycler preferences, and secure destruction requirements.

The "DigiMax Destroyer" features quiet and energy-efficient Low-RPM, High-Torque Opposing Rotor technology. The DigiMax is powered by a 20 HP motor, and is fully equipped with an electrical anti-jamming system, auto-reverse function, and a key-lock switch to ensure safe, secure, and reliable performance. Options include operator or conveyor shredder infeed. Compact and versatile, the "DigiMax Destroyer" can anchor plant-based recycling and secure operations, or may be truck-mounted for professional on-site shredding of hard drives and digital media.

CRESSWOOD "DigiMax Destroyer" Hard Drive Shredder

Launch Your Secure Destruction Services into the 'Digital Media Arena' with Super-Efficient CRESSWOOD Hard Drive Shredders - Plant-Based or Mobile!

According to industry experts, without complex & costly identification of hard drives and digital media is a costly & unending cycle. The innovative strength & innovation of DigiMax Destroyer™ Shredder can process up to 600 hard drives per hour in a compact size that will meet secure destruction requirements, and secure end-users. Compact & versatile, the "DigiMax Destroyer" may be utilized for plant-based operations or truck-mounted for shredding hard drives and a range of digital media with a comprehensive on-site secure destruction service solution.

FEATURES & BENEFITS:

- Complete Destruction of Hard Drives, Cell Phones, MP3s, CDs, DVDs, Tapes, etc.
- Quiet & Energy Efficient Low-RPM, High-Torque Opposing Rotor Technology
- Easy to Operate & Maintain
- Standard 40' Shipping Container Truck/Mobile Operation
- Powerful 20 HP Motor
- Key-Lock Switch
- Full Manufacturer's 10 Year Warranty (Limited Components)

CRESSWOOD "SDS Destroyer" Hard Drive Shredder

Digital drives & small format digital media are the mainstay of the modern office. Today's IT users are storing the quantities information used on hard drives and devices (MP3s, CDs, DVDs) and load up space on the end of their useful life in several short days. Cresswood's innovative "SDS Destroyer" Shredder is capable of shredding & destroying hard drives, and other digital media that can fit through the 1" x 1" x 1/2" opening into a 40' shipping container per hour. The "SDS Destroyer" is designed to allow the plant-based operators, or on-site truck-mounted mobile units, to be used in secure operations for on-site secure destruction of digital media.

FEATURES & BENEFITS:

- Complete Destruction of Hard Drives, Cell Phones, MP3s, CDs, DVDs, Tapes, etc.
- Quiet & Energy Efficient Low-RPM, High-Torque Opposing Rotor Technology
- Easy to Operate & Maintain
- Standard 40' Shipping Container Truck/Mobile Operation
- Powerful 20 HP Motor
- Key-Lock Switch
- Full Manufacturer's 10 Year Warranty (Limited Components)
