CRESSWOOD - Shredder Versatility & Unrivalled Support!

"After we were sold on the versatility & safety of single-shaft technology, our next question was 'who are we going to partner with?' Actually, our first purchase of a Cresswood Shredder was based on proximity, and we also liked that they are made here in the U.S. Then we loved the support - every issue was dealt with promptly and efficiently. What keeps us buying from Cresswood is that high level of support, and machine innovation that responds to our needs. Quincy wouldn't open a facility without a Cresswood Shredder."

*"When we buy a Shredder from Cresswood, we're not just buying a machine, we're buying a complete solution. They take the extra step to test-grind material, understand the application, and to recommend the right machine for the job. Their engineering team helps us put our system together - we don't have to do it on our own. We've never had to question the information that we get from Cresswood. **To sum it up - the overall value of our partnership with Cresswood is tremendous!**"*

Bryan Stokes, President
Quincy Recycle

Quincy Recycle is a commercial recycler offering B2B waste reduction solutions to customers throughout the Midwest from plants in Quincy, IL, Alsip (Chicago), IL, and New Haven (Fort Wayne), IN. Not limited by location, Quincy's 'material brokerage services' provides direct outlets for paper, plastics, and metals across the United States, and Canada.

Three Cresswood DESTROYER Shredders - an HF-7860-100A, an HF-7870-150ER, and an HF-7870-150A-EverNewGBP - custom-shred products and densify materials to produce ultra-compact bales in Quincy Recycle's processing operations.

■ See the HF-7870 spec sheet.

Cresswood Offers:
Custom-Built Single-Shaft, Low-Speed Shredders and Turnkey Systems for Recycling Operations - Paper, Plastic, Wood, Fabric, E-Scrap & Mixed-Media
