

# Snapshot REVIEW

**CRESSWOOD - Empowering 'Green-Tech' Solutions since 1978!**

*Pictured: Rich Calderwood, R&S, & Kevin Kelso, RPL*

*"Grinding pallet waste is an abusive process. We needed a robust machine to reliably and consistently reduce this material to customer specs in high-value chip markets, while fulfilling sustainability initiatives. The Cresswood Destroyers have fit this need for us. We also place great value in our vendor relationships, and Cresswood is a true partner with us - helping to improve and 'green' our processes, and satisfy our customers."*

Todd Rodewald  
Operations Manager  
Rehrig Penn Logistics

## REHRIG PENN LOGISTICS,

headquartered in Pleasant Prairie, WI, offers sustainable *repair/reuse/recycling* services for wood pallets & other returnable packaging from strategically located facilities. RPL procures, repairs & processes scrap from over 250,000 pallets per month.

To meet RPL customer specs, wood fiber is reduced to uniform particle sizes in one pass with three Cresswood "Destroyer" Grinders: Two HF-60-100's & One HF-70-125.

All three are equipped with the exclusive 'super-aggressive', 'high-output' Cresswood Destroyer Cutter Heads.

*"RPL delivers quality chips that keep our wood-fired gasification system running efficiently. The steam produced using this sustainable fuel is crucial for our operations - day in, day out."*
