

**CRESSWOOD - Proven Shredder Performance & Versatility!**

**SECURITY MOBILE SHREDDING, INC.**  
*Alexandria, LA*

Security Mobile Shredding, based in Alexandria, LA, offers a full range of NAID-certified secure destruction services to customers throughout the state – from the ultra-secure shredding of documents to precision grinding of obsolete products & rejects for manufacturers.

A Cresswood HF-7870-125 Shredder handles all off-site secure shredding requirements for SMS. Two 'custom built' mobile shred trucks, equipped with Cresswood HF-5440-50, & HF-4430-49 Shredders deliver the processing versatility to completely grind products down to safe & uniform particle sizes on-site, as well.

**SECURITY Mobile Shredding**

*"The versatility of Cresswood Shredders has made product destruction a profit center for SMS. We can process multiple materials with ease and with a quick screen-change, shred to the particle size the customer desires. As we like to say, 'the Cresswood can handle it – and keep on walkin'!"*

*"We've found that your 'method' of secure destruction matters. A few of our large financial institution customers will no longer allow destruction using a strip shredder. They inspected the output screened through our Cresswood, and pronounced it 'extremely uniform, like confetti'. Security comes first, and our Cresswood Shredders give us a competitive advantage, and our customers the peace of mind they're looking for."*

*"Downtime is so costly in this business that we swore we would only put our money into a dependable machine. The reliability of our Destroyers has alleviated a constant source of worry – we can actually sleep at night!"*
